

My name is Louise Page and I have been suffering with persistent shoulder, back and neck pain since experiencing a car accident in 2004. Since then I have had countless treatments for the shoulder injury including three operations and numerous other therapies.

In May 2009 I made an appointment to see Mark as the pain I was suffering had worsened and I was in a lot of discomfort. Right from the start I was extremely impressed with Marks thoroughness and obviously excellent subject knowledge and I was amazed by how he seemed to hit the nail on the head every time when identifying and diagnosing my symptoms.

He performed a series of painless and very gentle adjustments and has given me a great deal of useful advice regarding both my posture and lifestyle. I have seen Mark less than half a dozen times since then and each time I have come away with greatly reduced levels of pain and discomfort. I can honestly say that in 5 years of treatments, nothing else has come close to being as effective as the treatments I have had with him and I would recommend him to you unreservedly.

I feel better than I have done in years!
